

## Use Your BeatBelt™ In 4 Easy Steps:

**1. On the beater side of the bass drum, attach each hook to the left and right centered tension rods.**

**2. Wrap the BeatBelt™ around the throne and attach each end using the side release buckle.**

**3. Use the adjustable slide to change the length of the BeatBelt™ as desired.**

**4. Once the BeatBelt™ is attached, your bass drum will never move forward while playing and it doesn't get in the way!**

The BeatBelt™ quickly attaches and detaches to any bass drum allowing you to use it anytime you are playing. Remember to detach the side release buckle when you are done playing so you don't trip on the BeatBelt™...That would be unfortunate...
